Intell Group

Introduction

Intell Group A diversified Health & Safety solutions provider focused on streamlining onboarding, enhancing safety learning and managing HSE compliance for Corporates, Contractors and their employees.

What We Stand For

Commitment to Continuous Improvement

We pride ourselves in the provision of solutions that reflect our values, the culture of continual quality improvement, and the philosophy of getting things “right the first time”. Our ethos extends to the enhancement of the skills of management and employees through review and ongoing development. All organisations are required to demonstrate a strong commitment to safety through continuous improvement. By ensuring safety is intrinsic to the organisation, the necessary behaviours to support a culture of safety will be instilled.

Compliance to Statutory and Regulatory requirements

Intell Group’s success is underpinned by decades of conducting business within a strict moral and ethical framework. With our multiple certifications and accreditations, we demonstrate international best practices as we guide organisations to achieve a sustainable safety cycle through navigation of applicable laws and regulations, and the development of operational compliance strategies which will continuously engage and empower the workforce to apply optimised safety practices.

Competence in Operational Risk Management

To aim for the highest standard in health and safety, organisations are required to have highly competent teams who are skilled in managing and mitigating operational risk. Critical to this success is the application of risk-based thinking in the implementation of policies and procedures that align to industry-specific standards, and the implementation and ongoing monitoring of the relevant Management Systems. Our expertise in delivering customised Operational Risk Management Programmes will assist in achieving sustainable behavioural change throughout the organisation.

Company Overview

Health and Safety in South Africa are always consistently criticised by the media about the ever-rising incidents of delayed response to emergencies. The very nature of our society is responsible for this dilemma, but there is a solution for this. By ensuring that we have people trained in the working/home environment, we can make the difference between life and death. A further consideration should be the training of employees in Health and Safety issues to prevent problems before they arise.

Quality

Intell Group (Pty) Ltd is committed to its Quality Management System as it not only provides direct benefits, but also makes an important contribution to managing costs and risks. These have a direct impact on the overall performance of the business. Within our Quality System we need to address certain principles to ensure that our system has a platform.

Mission

Our mission is to have our professional services rendered to our valued clients to be of the highest quality and standard. All our courses to be outcomes based and continuously upgraded to ensure that the maximum amount of knowledge and skills are transferred to the learner.

Vision

Our vision is to be the leading provider known in the workplace through our value-added inputs, training and consulting services and that the evidence of our services will show an increase in productivity, better profitability and a safer working environment.

Quality Statement

Our business goal is to get it right first time, every time and strive to exceed customer expectations whenever possible.

Business management process

Our business system will conform to the requirements of ISO 9001:2015

Business principles

Quality derives from a staff commitment to service and excellence. This belief is stated as business principles:

Customer focus: Customer requirements come first. Quality begins and ends with the customer and we strive to always satisfy their needs. This is reflected in our flexibility – both as individuals and as an organisation.

Relationships: We build mutually beneficial relationships with customers and suppliers.

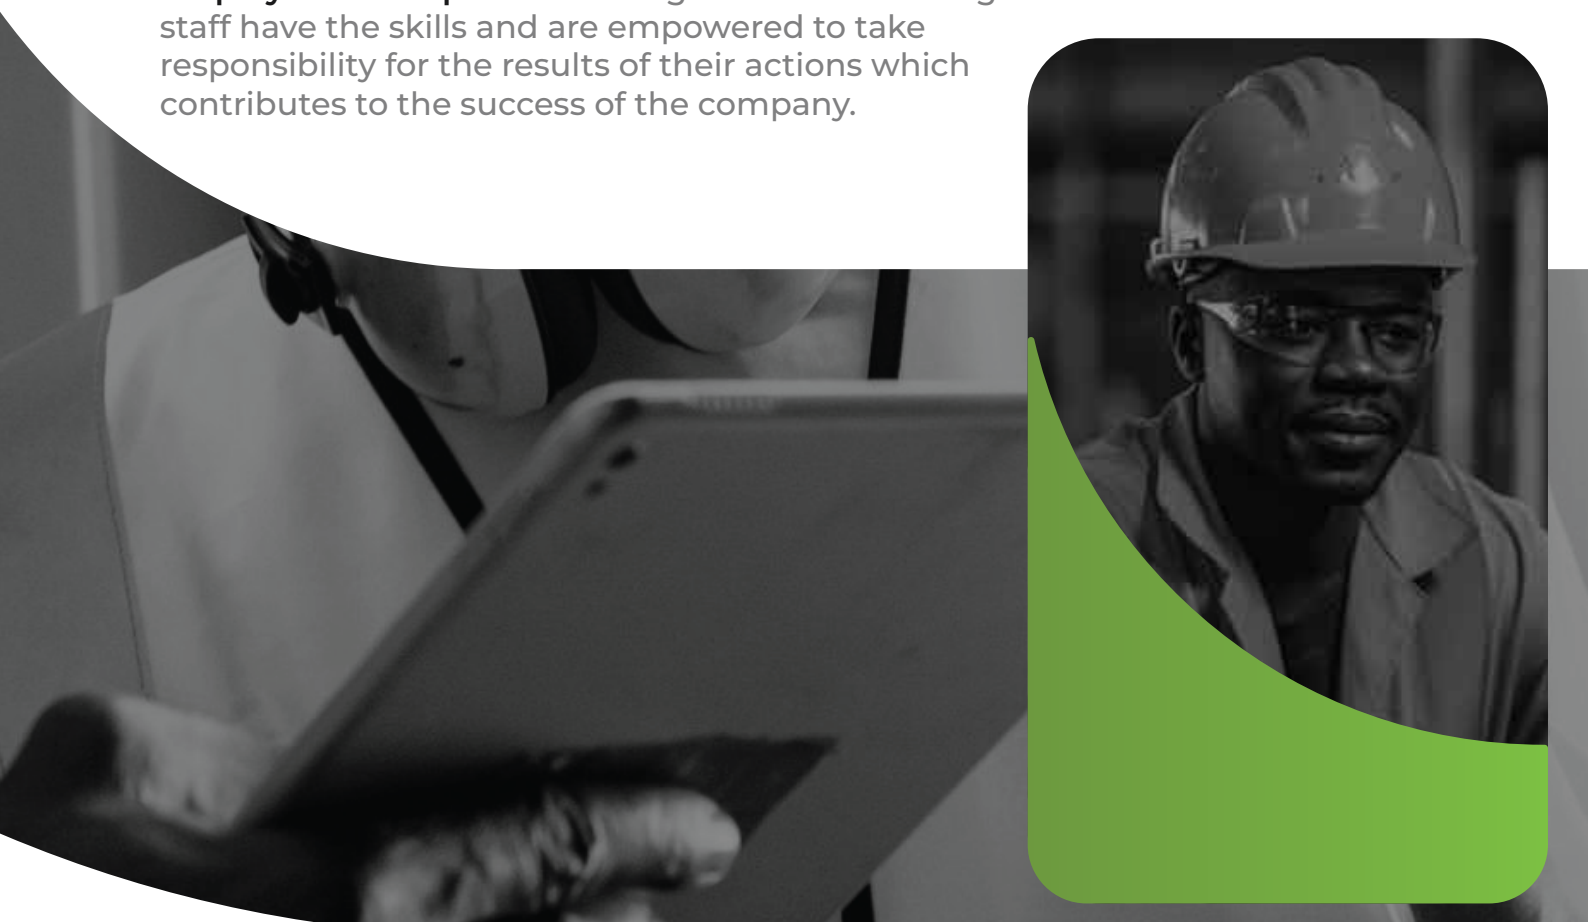

Innovation; We search for, design and supply creative products and services.

Teamwork: Our Employees work together as a team to satisfy our customers.

Process emphasis: We focus our Employees on practical processes to ensure consistent results.

Continual improvement: Through management review of our Business Management System we aim to continually improve business performance, processes, products and services.

Employee development: Through active mentoring we create a culture where staff have the skills and are empowered to take responsibility for the results of their actions which contributes to the success of the company.

Scope & Background

Benefits can include:

- Increased cost savings opportunities
- Supplier performance and risk mitigation
- Greater process efficiencies
- Detailed reporting
- Project performance management
- Visibility into all outsourced projects within a single purview
- Improved workforce management
- Organisational compliance and risk mitigation

Providing successful SOW management gives hiring managers the tools necessary to make informed buying decisions and maximises productivity throughout an organisation.

Additionally, unexpected circumstances, scope creep, and post-contract changes can require amendments to the original SOW. Strong SOW management offers the tracking and reporting necessary to enable business leaders to make such changes.
